Policy 17-003 Updated

If a maintenance medication is written by a physician and it is given a 30-day supply with an appropriate number of refills through a year, then the pharmacist can fill that prescription as a 90-day supply with the commiserate number of refills without contacting the physician to obtain a new prescription. This applies to noncontrolled medications. This will aid the public health in being able to give the patient a 90-day supply at a time and improving compliance. In addition, a pharmacist may fill a prescription a lesser quantity than written by the physician at the request of the patient.

This policy was accepted by the Board of Pharmacy during the Business Meeting 5/13/2020. This final draft was approved by all Board Members.
